

## Good Practice for Successful Learning

1. **Be organised** - Have all the notes and equipment that you need when you go to class
  - Have a system to keep track of due dates for homework and assignments
  - Pack your bag the night before school, you are far less likely to forget things
  - Spend time at night reading over the days work, this sets you up well for learning the next day
2. **Be prepared** - Start your day by committing your time and efforts to God and asking for His help in your learning
  - Know your timetable so you know what subjects you have each day
  - Go into each lesson expecting to concentrate, learn and be challenged
3. **Be enthusiastic** - Treat each day as a gift from God and be excited to have the opportunity to extend yourself in Him, even when the work itself may seem difficult or irrelevant to you.
  - Remember it is not just about what we do but how we do it!
4. **Let your learning reflect your heart** - God has called you to be all that you can be in Him and this includes your role as a Learner
  - Value diligence and excellence and strive to achieve them in all you do
5. **Be committed** - Remember that We have the Holy Spirit with us at all times, so we do have the ability to complete every task
  - Develop perseverance and tenacity in your life, they are life skills that will carry you through all situations.
  - Set yourself goals and have the character to follow them through
  - Work a study plan for yourself and be consistent in following it
6. **Be a “Big Picture” learner** – Understand that learning is about life skills and attitudes as well as knowledge and facts.
  - Look for ways to use learned skills in different areas
  - Identify applications of your learning in your everyday life
